Accounting is based on the principle of two-sided. In order to carry out business activities, the company needs funds; these funds must be given to the company by someone. The funds owned by the company are called assets. Part of these assets is provided by the owner, total amount of funds contributed by him is called owner's equity or capital. If the owner is the only one who contributed ...

Accounting Equation Problems and Solutions | Balance Sheet ...

The basic accounting equation is $\text{assets} = \text{liabilities} + \text{owners' equity}$. You can always double-check your answer by going back to the original equation $\text{assets} = \text{liabilities} + \text{owners' equity}$. In this example, the sum of liabilities of \$245,000 and owners' equity of \$331,000 is \$576,000.
